

I've been fortunate enough to work in just about every genre of the unscripted/docu-world over the past 20 years. I've edited on over 100 individual series and cut 1000s of acts. This gives me a unique perspective and I can bring all that experience to your project.

I'm tenacious. I have a strong work ethic and am my own harshest critic. This has served me well as I constantly strive to push my boundaries and stay fresh in the ever changing entertainment landscape. I have cut shows for most streaming platforms and just about every major network and cable outlet.

I can work as a show builder, lead editor or a polisher/ finisher. I cut super teases & promos too. I can work alone with just a stringout and deadline or within a post team structure. I believe that story is paramount and my job is to tell that story in the most interesting way possible.

I do a ton of development work also so I know how to bring the flash and sizzle. Please take a look at my website at your convenience for lots of reels and a complete list of my credits. Thank you for your time & consideration.
